Examiner's amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Clark Jablon on Dec. 29, 2004.

Please amend the title with the following:

PRINTING SYSTEM WITH PRINTER DRIVERS SELECTION

Allowable Subject Matter

2. Claims 6-14, and 18 are allowed.

Claims 6 and 18 are independent claims.

The following is an examiner's statement of reasons for allowance:

As to claim 6, the present invention from the application discloses the structure of the printing system comprising a computer having printer driver selecting section which compares the environments of the computer and the printer from a computer environment determining section and a printer environment determining section which determines an environment of the printer based on information sent from the printer to select one of the printer drivers; and the printer further including an emulation judging section which judges one of the emulations

corresponding to the selected one of the printer drivers. The closest prior art such as Lee (US Patent No. 6,567,175 B1) discloses a printer driver calling device for selecting one of printer drivers corresponding to control signals from control unit generated after control unit determines the operational state of computer and printer; and Brown, III et al. (US Patent No. 5,960,166) teaches that the printer receives the print data in PDL format generated by the printer driver from the computer. However, the combination of Lee and Brown, including an updated electronic text search, fails to anticipate or render the above underlined limitations obvious.

As to claim 18, The closest prior art such as Lee (US Patent No. 6,567,175 B1) discloses a printer driver calling device for selecting one of printer drivers corresponding to control signals from control unit generated after control unit determines the operational state of computer and printer; and Brown, III et al. (US Patent No. 5,960,166) teaches that the printer receives the print data in PDL format generated by the printer driver from the computer. However, the combination of Lee and Brown, including an updated electronic text search, fails to anticipate or render the particular following limitations obvious: “an intermediate metafile generating section which generates an intermediate metafile from image data; an intermediate metafile analyzing section which analyzes an evaluation size of the generated intermediate metafile; and a printer driver selecting section which selects one of printer drivers on the basis of the analyzed evaluation size and a free memory size of the printer”. The above underlined limitations render this claim allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
